NEW DECOMPRESSION TABLE RELIEVES PAIN

Darren Strong from Strong Chiropractic, announces a new, sophisticated computerized decompression table that allows the spine to be gently stretched and relaxed for spinal decompression therapy.

The pattern of alternating pulling and relaxing creates vacuum-like pressure which allows disc material that was herniated or protruded to be pulled back in the disc over time.

Patients will notice a reduction of their pain during these treatment sessions. Stop in today and ask about the new table and how you can benefit.

Take 2

PAUL POWER

It's obvious that a lot of people are stressed out about all the political, economic and world chaos that surrounds them each and every day (to be honest I blame social media, the internet and the 24/7 news channels for a lot of that; networks that no longer care about the truth-it's all about driving their agendas and getting the commercials squeezed in). Most of it has no real relevance to our daily lives. Don Henley said it best; "We got the bubble headed bleached blonde comes on at five"she can tell you 'bout the plane crash with a gleam in her eye it's interesting when people die give us dirty laundry". After that rant I wanted to suggest something that is refreshingly wholesome, sweet and may restore your faith in humanity a bit-all courtesy of Brendan Fraser. From 1991 to about 2018 Brendan had global success but marital problems, combined with health issues and basically being blacklisted from Hollywood (which by today's standard is a badge of

honour) sidelined his career for quite some time. His triumphant return in the film "The Whale" in 2022 opened the doors again and he stole the show. "Rental Family" is his latest film and the storyline is that he plays American actor Phillip Vanderploeg who lives in Tokyo and is always searching for work-trying to follow his success in a tooth-paste commercial seven years ago. Minor roles come and go until he is hired by Rental Family, a company that provides actors to play stand-in family members and friends for strangers. Unsure of the job because of it's wacky premise Phillip, desperate for money, takes it and becomes the company's "token white guy". All this leads to the 'feel good' movie of 2025. Check it out.

- TAX TIPS 2026 -

Our security protocols: The H&R Block "Shield"

When choosing where to file your taxes, ensure your tax preparer is committed to protecting your data, and has the tools required to do it well. Here's a look at some of the cybersecurity measures we have in place to keep your information safe:

1. Mandatory Multi-Factor Authentication (MFA) - You've likely used this for your bank: it's the digital equivalent of a second lock on your front door. By requiring a password plus a secondary code on all our internal systems and client platforms, we ensure that even if someone guesses a password, they still can't get your personal information. Think of this as a way to prove it's really you, twice.

2. 24/7/365 cyber defense monitoring - Fraudsters don't take the weekends off, and neither do we. Our dedicated security teams leverage "always-on" monitoring to flag suspicious activity in real time. If something looks off, we're already on it.

3. Advanced email protection & encryption - Sending tax slips via a standard email is a bit like sending your diary on a postcard - it's something you should never do. Our systems use best-in-class encryption to protect your documents. We even restrict certain data from being sent by email, keeping your private information out of the digital "lost and found."

4. Cybersecurity-certified Tax Pros - It's not just about tech; it's about the people. Every H&R Block Associate undergoes mandatory, ongoing cybersecurity training to spot the latest threats before they ever reach your file.

5. Secure handling & storage - Your data is stored securely with strict handling protocols, safeguarded by our cybersecurity team. We manage your information with the same care we'd use for our own.

File with confidence, not concern

THE HUMAN TRAMPOLINE

In this book, you'll read many stories about well intentioned things that have gone astray. This is another example of that.

My father worked the back shift at the Steel Plant and would get home shortly after midnight. On this particular night it had rained heavily for some time. We lived in a basement apartment that often flooded after a heavy rain and tonight was no exception. My father splashed in the water on the floor and knew if he took off his work boots he would get soaking wet.

So in his flawed logic, he thought that if he ran quickly through the water and jumped in bed, he could take his boots off and not get his feet wet.

As Robbie Burns once said, "the best laid plans of mice and men, often go astray." This was an excellent example of that saying.

My father tip toed through the water and leaped on the edge of the bed. Being no lightweight at 260 pounds when he hit the bed, the box spring collapsed and my mother was thrown in the air and she and my father ended up on the wet floor.

The screams woke us up and Mom went upstairs to the couch and left dad in the wet bed. \$500 later with a new box spring and mattress, the "human trampoline" had learned his lesson.

- EXCERPT FROM THE BOOK "WAT'S YER FODDERS NAME BYE?"
